SoftGuard[®] Safety Restraint Chair

Specs

LEAD-IN

The SoftGuard[®] Safety Restraint Chair was developed based on client feedback for the Psychiatric, Behavioral health, and Medical environments.

- One-piece box steel welded frame for long life and durability
- These chairs have been used with patients as small as 45 lbs. and as large as 475 lbs. as long as they are tall enough to have feet fully rest on footplate with their seat reaching the back of the chair seat.
- Chair weighs 80 lbs.
- Chair dimensions: 45-1/2" long by 28-1/2" wide by 42" high (fits through a standard 30" wide door)
- Extra padded back and seat for softer, more comfortable restraining period
- Heavy duty 8" diameter wheels with a rated capacity of 450 lbs. each
- 2" wide extra long nylon wrist straps (12" longer) than the **SureGuard[®] Safety Restraint Chair**
- 2" wide extra long nylon ankle straps (24" longer) than the **SureGuard[®] Safety Restraint Chair**
- 18" Hook 'n Loop soft restraint straps at the elbow for secure restraint of the patients while providing maximum comfort
- Non-locking restraint mechanisms at the ankle, wrist, lap, and shoulder harness straps for quick release in the event of a medical emergency
- Memory foam headrest which reduces chances of head injuries and provides greater comfort
- Bolt end covers (acorn nuts) on the exposed bolt ends under the Arm Rests to reduce the risk of injury
- Full coverage high density polypropylene skid plate beneath the foot plate for ease of chair/patient movement (not intended for vehicle transport).
- Brakes on wheels keep the chair in place during the restraint process
- Shoulder straps do not cross the chest and therefore do not restrict breathing
- Keeps patient and medical staff SAFE humanely!
